

2231512021017

Code No. : 2231

COMPUTER PROGRAMMING USING PYTHON

[Maximum Marks : 50]

2231

Time : 2:30 Hours]

NOTES:

- i) Attempt all questions.
- ii) Students are advised to specially check the Numerical Data of question paper in both versions. If there is any difference in Hindi Translation of any question, the students should answer the question according to the English version.
- iii) Use of Pager and Mobile Phone by the students is not allowed.

[2 × 5 = 10]

any
lish

Q1) Attempt any two of the following:

- a) How will you create an object in python.
- b) What are regular expressions in python. How these expressions can be accessed.
- c) Is it possible to assign a single value to more than one variable. If yes how it is done.

[2 × 5 = 10]

0]

Q2) Attempt any two parts of the following:

- a) What is a shift operator in python? Discuss.
- b) What is a set? How a set is created?
- c) How a function is called or executed?

[2 × 5 = 10]

Q3) Attempt any two parts of the following:

- a) What are standard library modules in python.
- b) What are user defined exceptions? Illustrate through example.
- c) How you can append data on to a file? Illustrate with example.

[2 × 5 = 10]

Q4) Attempt any two parts of the following:

- a) What are character classes? Discuss their use with suitable example.
- b) What is data stream? How will you create own data stream.
- c) What is IDLE? Write a python program for find Number is Prime or Not.

[2 × 5 = 10]

Q5) Attempt any two parts of the following:

- a) Explain python naming conventions.
- b) What is dynamic type in python?
- c) What is environment variable? What are Quantifiers?

- i) Attempt all questions.
- ii) Students are advised to specially check the Numerical Data of question paper in both versions. If there is any difference in Hindi Translation of any question, the students should answer the question according to the English version.
- iii) Use of Pager and Mobile Phone by the students is not allowed.

Q1) Answer any two of the following:

- a) What are important features of python?
- b) Differentiate between lists and tuples.
- c) What is class in python? How is it created?

[2 × 5 = 10]

Q2) Answer any two of the following:

- a) Explain different file operations in python.
- b) Define dictionary? How is it created in python.
- c) Explain bitwise operators used in python.

[2 × 5 = 10]

Q3) Answer any two of the following:

- a) What is exception? How is it handled in python?
- b) Explain Greedy match in python.
- c) Explain scope in python.

[2 × 5 = 10]

Q4) Answer any two of the following:

- a) List the common built-in data types in python.
- b) Define string in python.
- c) Define function in python with suitable example.

[2 × 5 = 10]

Q5) Answer any two of the following:

- a) Explain while loop in python.
- b) Differentiate between break and continue.
- c) Explain if statement with example.

[2 × 5 = 10]

COMPUTER PROGRAMMING USING PYTHON**Time : 2.30 Hours]****[Maximum Marks : 50****NOTES:**

- i) Attempt all questions.
- ii) Students are advised to specially check the Numerical Data of question paper in both versions. If there is any difference in Hindi Translation of any question, the students should answer the question according to the English version.
- iii) Use of Pager & Mobile Phone by the students is not allowed.

Q1) Answer any two questions of the following :-**[2×5=10]**

- a) Define list and its three operations.
- b) Define Dictionary, how is it created in python?
- c) Explain Python history.

Q2) Attempt any two questions of the following:-**[2×5=10]**

- a) Explain while loop in python.
- b) Explain SYS module used in python.
- c) What is exception? How is it handled in python?

Q3) Attempt any two questions of the following:-**[2×5=10]**

- a) What is file? And how is it opened in python? Explain.
- b) Write the special characters used in a regular expression.
- c) Explain the greedy match in python.

Q4) Attempt any two questions of the following.**[2×5=10]**

- a) What are important features of python.
- b) How data is stored in python dictionary.
- c) What is class in python. How is it created.

Q5) Attempt any two questions of the following.**[2×5=10]**

- a) How a variable defined inside a function can be defined as global. What points should be kept in mind while declaring variables as global.
- b) Differentiate between lists and tuples.
- c) What is a multiple except block. Write down the syntax for specifying multiple except block for a single try block.
